

As you may know from news reports, and perhaps from those you may know who have been hit with it, flu season is in full swing. Here at the school, our maintenance staff cleans/disinfects around the building regularly. Of course, this is helpful in efforts to keep students and staff healthy, yet it does not guarantee that someone will not be affected by some form of sickness. That noted, I ask that you please monitor your child's health status, and – if she/he is ill – it is best that you keep her/him home until well. Remember, in the event your child is running a fever, she/he must be fever-free for 24 hours before returning to school. Follow the link provided here to see actions recommended by the CDC for protecting yourself and others from flu:
